MEDICAL PATIENT ADVOCACY COMPANION

1

Hello. I use cannabis for my medical condition of _____. I was wondering if you have any products or services geared towards medical patients?

Are all of your products High THC or do you have products with higher CBD, CBG, etc.?

2

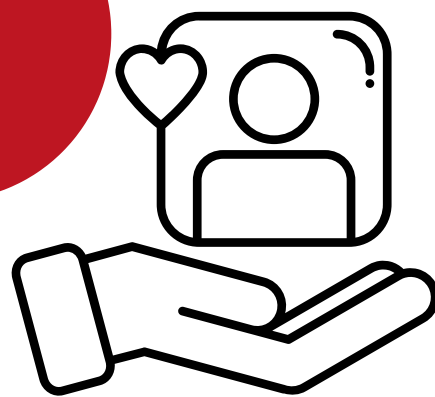

3

Does your staff help medical patients understand the benefits of terpenes?

How is your staff trained to deal with medical patients since we have different needs than adult use customers?

4

5

Medical Cannabis Patients are extremely loyal to the growers, manufacturers and dispensaries that look after us. I hope I can count on this business for quality and consistency. If so, I will tell my friends.

THANK THEM AND ASK THEM NOT TO FORGET THE MEDICAL CANNABIS PATIENT IN THEIR OPERATIONS

Thank you for your time. I know for some people a trip to a dispensary can be part of planning fun. For the medical patients, it's a necessity and an errand we run regularly. We have a cannabis budget. We want to know that budget is going towards good, safe products that address our conditions and that they will be consistently available and not switched out often. That is especially important with the flower.
